## EXPERIENCE

### Northreal, Rochelle Park, NJ — Full Stack Web / Mobile

April 2013 - July 2016

Developed backend software for real estate search organizer, including: real estate data parser, client REST services, and database. Rebuilt the android app, and developed the initial IOS app and chrome extension.

### JPMorgan Chase, New York, NY — Full Stack

Jan 2012 - MAR 2013

Lead development of the mortgage search module, the primary entry point for each customer session in the JPMC call center application, which is the software used by over 1,500 concurrently active call center agents providing customer service to JPMC mortgage clients.

### XFactor Communications, S. Hackensack NJ — Full Stack

Dec 2006 - Dec 2011

Developed a digital signage solution in partnership with Verizon, NEC, Cisco Systems, and Cynergy Systems for the United States Postal Service. The solution operates on Cisco set top box DMP 4400 (Linux) at 600+ post office facilities for employee facing content displays.

### Washington State University, Pullman, WA — Full Stack

Jan 2004 - Oct 2006

Developed myResearch online training software for WSU. Completion of the online training became mandatory for all grad students and for faculty who perform research at Washington State University and over 6,000 online training sessions were completed as of Feb. 2007.
